TN VOICES, TELEMEDICINE SOLUTIONS TO LAUNCH NEW APP WHICH WILL PROVIDE MENTAL HEALTH SUPPORT FOR TENNESSEE YOUTH

NASHVILLE, Tenn. - [TN Voices](#), Tennessee's leading mental health support services nonprofit, in coordination with its technology partner, [Telemedicine Solutions, LLC](#), has developed an electronic platform to assist Tennessee youth with mental health support services. As many Tennessee youths have access to a smartphone, TN Voices is currently in pre-launch testing for the [MyHealthCoach](#) MindPower app.

[Graphic images from app can be downloaded HERE](#), and a QR code is provided for media to download and video the app.

The partnership focuses on specialized app development and processes associated with a presence on both the [Apple App Store](#) and [Google Play Store](#). With the addition of an emotional health component to the MyHealthCoach platform, a collaborative partnership began between the two agencies in the fall of 2021. The focus of the work has been to develop a tool which is engaging, while at the same time allowing for a quick anonymous assessment with information about support services immediately provided to those with an identified need.

In addition, the app allows youths of all ages a means of attaining parental consent for a more involved assessment and to attain the services of a treatment provider.

"We are honored and humbled to be working side by side with such an amazing team and organization in TN Voices as we launch MyHealthCoach MindPower," says President and CEO of Telemedicine Solutions Mike Diamond. "With this partnership we continue to cement our mission. We exist in order to help improve the quality of people's lives."

In April 2022, the app began to roll out for testing with a campaign conducted by TN Voices at [Lead Cameron Middle School](#), [KIPP Academy Nashville Middle](#) and [South Lawrence School](#).

“The collaboration with the TMS team has been essential to this work, and we consider their staff exemplary partners. Working with the MyHealthCoach Team has been a joy and delight,” says TN Voices Chief Operations Officer Willie M. Voss, II, M.S. “TN Voices is proud to partner with the team to continue educating others on the importance of mental health and gain access to services and support.”

If you are a Tennessee resident who is now unemployed or without insurance and you are in need of mental health services, you can call the TN Voices Hope Fund hotline at 615.269.7751.

If you or someone you love needs help maintaining your mental health or processing current crises in general, TN Voices staff are available to serve you at 1.800.670.9882. To donate to help fund mental health services for Tennesseans in need, log onto TNVoices.org/Donate.

Members of the media inquiring about interviews with TN Voices can contact BrianSullivanPR@gmail.com or 901.949.7926.

Those who would like information on mental health advocacy in Tennessee, and to receive updates on TN Voices, email them at TVC@TNVoices.org to join their mailing list.

ABOUT TN VOICES

TN Voices speaks out as an active advocate for the emotional and behavioral well-being of Tennesseans by providing essential services, support, and advocating for policy change at the local, state, and federal level. We are deeply committed to assisting and supporting our fellow Tennesseans by reducing stigma and increasing acceptance. The TN Voices vision is to build hope for all generations and our mission is to be the collaborative leader in guiding mental health transformation. Founded by former Second Lady of the United States Tipper Gore in 1986, we are a 501(c)3 that provides advocacy, training, support, referral, prevention and early intervention.

ABOUT TELEMEDICINE SOLUTIONS, LLC

Telemedicine Solutions, LLC is a mobile health technology company with a mission to improve the quality of life for people living with chronic diseases via simple apps designed to optimize care, while at the same time, reducing the cost of the care delivered. The MyHealthCoach platform streamlines clinical workflows and enables text, image, secure video communication, and other tools in order to alleviate chronic disease through easy, engaging and secure communication around shared health measures, tracking progress with care plan compliance, wellness goals, and patient education.
